## MATCHING COLORS:

The sublimation process involves many variables that affect the final color of the product. Every possible effort is made to match colors as closely as these variables will permit. Slight color differences may occur between and within orders of sublimated product. All orders are accepted with the understanding that the purchaser realizes these conditions and accepts responsibility within reasonable tolerances.

Color differences between sublimated and non-sublimated and fabrics may occur due to different coloration methods. Matching sublimated and non-sublimated fabrics within garments or uniforms is highly discouraged.

## HOW TO MEASURE:

**Chest**—The tape should be placed under the arms level across back muscles and chest. Have the person take a deep breath when reading the measurement.

**Waist**—The tape should be placed around the waist above the top of the hip bone. It should be positioned approximately where the person wears a belt.

## NOTES:

1. Always use a cloth tailor's tape when taking body measurements. Place the index finger and middle finger between tape and body while holding the tape with thumb.
2. For circumference measurements of the body, the tape measure should not be pulled too tight.
3. For garment size, use the tape measurement to the next largest inch.
4. Garment sizing is determined from the actual body measurements. A specific size garment, e.g. size 42, is designed to fit a body with a chest measurement of 42".

## The actual size of the pattern and garment will be determined by:

- a. Requirements of the sport (designed for loose or tight fit).
- b. Type of fabric intended for the garment design.
- c. Special garment styles or designs. When the above adjustments have been factored into the pattern, the garment should fit the proper size body as indicated on the size label of garment.
- d. The type and size of pads worn by the player

## UNIFORM CARE

---

**WASH UNIFORMS PRIOR TO FIRST USE AND IMMEDIATELY AFTER EACH USE.** Naturally occurring PH levels in sweat may cause dye migration in first use. We recommend a detergent like Tide® Plus Coldwater Clean. Prior to washing in cool water, turning the garments inside out will help preserve Twill, Vapor Fusion™, HS Fusion, and Embroidery. Claspings Velcro® prior to washing may help prevent snagging or picking.

**DO NOT WASH UNIFORMS WITH OTHER ITEMS.** Bleeding may occur.

**DO NOT USE BLEACH.** Bleach will deteriorate fabric fibers and may cause color loss.

**DO NOT OVERLOAD WASHER OR DRYER.** Hang dry is recommended for best results. In the dryer, overloading may cause the uniforms to stick together, especially those with HS Fusion. Remove garments immediately after both wash and dry cycles. To avoid static and lint build-up, use an anti-static agent such as Bounce® Dryer Sheets.

**DO NOT EXPOSE UNIFORMS TO HIGH HEAT.** Excessive heat is the enemy of your uniform. Heat presses, ironing, dry cleaning, or heat transfers may cause dye migration and break down fabric fibers. Excessive heat, especially in dryers, can cause shrinkage above normal tolerances, cause HS Fusion to crack, and Twill to wrinkle. If you use a dryer, please use a 'damp dry' or 'air dry' setting.

**STORE IN A COOL, DRY AREA, AWAY FROM DIRECT SUNLIGHT.** Excessive sunlight may cause discoloration.

### Heavily soiled garments (grass, dirt, clay mud), pre-treatment is recommended

- Spray on products such as Spray 'n Wash®, Shout®, or ESPRO® cleaner have been tested with positive results.
- Products such as Shout® Advanced Action Gel can be used for stubborn stains.
- For blood stains, it is best to rinse in cool water as soon as possible, and if necessary, soak in cool water before washing. One of the above pre-treatments can also be used, or an oxygen-based laundry booster such as OxiClean® can also be used.
- For ink stains, use hair spray as soon as possible. Delaying the application of hair spray may decrease results. Spray on stain and rub until the ink is gone. Wash as normal.
